WORK ON THE HOTEL PROGRESSING

The finishing on the Imperial hotel is receiving the attention of the carpenters and painters. Mr. Barker, of Tofted has the contract for the painting and has about finished the outside work. The color scheme for the exterior is a buff with trimmings of brown, and presents a pleasing appearance.

The material for the plumbers is now on hand and the heating system will be installed immediately. Every room will be fitted with a steam radiator and the hotel promises to be one of the coziest in Alberta.

NEW NAME FOR SCHOOL DISTRICT

At a meeting of the trustees of Lamerton School District, No. 402, held last Saturday, it was unanimously decided that the Board were in favor of uniting with the village of Mirror in forming one district, and changing the name from Lamerton to Mirror. A resolution to this effect was passed and will be forwarded to the Department of Education. The Trustees are fully aware of the advantages that will be derived, by moving the school to Mirror and sharing in the additional facilities.

The delegation from Mirror who waited on the Board included R. H. Herberman, repre-

senting the Village council; and J. F. Flewelling and W. G. McCormack, the Board of Trade.

HIGHLY PLEASED WITH INVESTMENT

Miss Agnes Dow paid Mirror a visit on Tuesday last for the purpose of investigating her holdings in this place. To say that Miss Dow is well pleased with her investment is expressing it mildly, and she was more than surprised at the growth of the town. Besides owning a number of fine residential lots she has also several lots in the business section, all of which are high and dry and well located. Miss Dow expects to return shortly and erect a store and a number of houses.

FREIGHT SERVICE FOR THE SOUTH

The G. T. P. have inaugurated a freight service to handle way freight between Mirror and the end of the steel, and it is expected that trains will leave here twice a week, until such time as the road will be completed into Calgary. The first train left here Monday, with five cars of merchandise and two cars of binder twine for different points along the branch.

R. Patten, who will be in charge of the switching in the G. T. P. yards here, will also have charge of the run to the south.

MIRROR DISTRICT EULOGIZED BY AMERICAN EDITOR

HEAD OF ONE OF CHICAGO'S BIGGEST DAILIES DELIGHTED WITH THIS SECTION OF ALBERTA—PREDICTS GREAT FUTURE FOR MIRROR

One of the largest attended meetings of the business men and others ever held in Mirror took place last Thursday evening in the King George restaurant, when our citizens gathered together to hear an address from Major M. E. Dickson, editor of the Chicago Examiner.

Mr. Dickson is on a tour through Western Canada, gathering material for a series of articles for his paper, which is one of the biggest periodicals in the United States. As his write-up would not be complete without a description of some of the newer towns, he decided to visit Mirror and district, and to use his own term, "I am simply 'flabbergasted' with what I have seen."

In the course of his remarks at the meeting, Major Dickson expressed his pleasure at being able to meet the pioneers of one of the coming cities. "Gentlemen," he said, "this visit to your town and country has been a veritable revelation to me. I have travelled through a great many countries but never before have I seen such growth and vegetation as greeted my view this afternoon. I

have never seen anything that could compare with the garden at the Rider farm on the shores of Buffalo lake, and when I got back to Chicago and tell my experience my friends won't believe me. It's simply astounding, as we were always under the impression that this part of Alberta was good for nothing else but raising wheat.

"The possibilities in the near future can hardly be estimated; you are only on the threshold of a wider inheritance, and in a year or so I predict a population of thousands in your town of Mirror. You have one of the finest mixed farming districts in the world, capable of raising stock, grain, to supply a multitude. There is nothing to prevent the town developing into a large centre of trade and commerce. It's a foregone conclusion."

The visit of Major Dickson should be of immense benefit to Mirror. He has been engaged for over forty years in journalistic work in the city of Chicago, and now occupies one of the most responsible positions on the staff of the Examiner. His statements should carry weight that is given to very few editors to employ.

Arnprior has a certain process for manufacturing brick in 10 hours, from sand and other ingredients over which they have the control, and it is expected that the lake sand will meet with their requirements.

Personal Paragraphs

E. and Mrs. Bashaw, Miss Edna Sanderson, Eddie Bashaw and J. E. Steers motored from Bashaw on Wednesday evening in a new Overland touring car. Miss Sanderson is spending a few days with Miss Mabel Steers.

R. and Mrs. Toeffer, of Alix, and Bob Toeffer, of Edmonton, were visitors in Mirror on Wednesday.

Mrs. N. H. G. Ruthven, Mrs. C. J. Higgins, Miss N. Balfour, and J. G. Breene were in Alix on Saturday and witnessed the tennis match between Mirror and Alix.

H. L. Staples, who was formerly manager of the Bank of Toronto in Mirror, spent last Sunday in town. Mr. Staples has been relieving at points in Manitoba for some time, and is now his way to Veteran, Alta.

where he will open a new branch. He noticed quite a number of changes in the appearance of the town, and thought everything very much improved.

Fred. Doveswell was in Lamonte on Monday.

A. C. and Mrs. Raymer, of St. Paul, Minn., spent Wednesday with H. J. Raymer. The gentlemen are brothers.

A. W. and Mrs. Perkins, of Udall, Oklahoma, returned to their home this week after spending a few days with Jas. Rider and family. They spent some time in Manitoba before coming here.

LAKE STREET GRADING

During the past week or two a great deal of work has been done on Lake st., and the main street is taking on the appearance of a first-class thoroughfare. The elevations are being cut down and the low spots filled. In some places a cut of five feet was made so as to give the correct grade. The stores of Suggett Bros. and Duitman & Johnson's will have to be raised a foot or two to meet the level of the street.

EVENTS AROUND TOWN AND DISTRICT

Another Outfit Starts
J. C. Simpson's threshing outfit started work at the farm of Geo. Neis on Thursday.

Board of Trade
Will meet on Tuesday evening of next week. Every member should make an effort to attend and take an interest in matters dealing with the welfare of the town.

Will Live in Edmonton
On Monday morning C. F. Bentley left for Edmonton, where he will go into the lumber business with his father. We regret to see Mr. and Mrs. Bentley leaving town, but wish them success in the Capital.

Building Sold
The building in Lamerton, formerly occupied by Geo. B. Williams, has been sold to Percy Walters, of Tees. Mr. Walters will move the building during the coming winter. The route will be over the hills and the house will be hauled nine miles to its new site.

Away About Hotel License
W. J. Kadlec is away on a business trip to Edmonton and possibly Winnipeg, in connection with a renewal of liquor license for the Grand View hotel at Lamerton. Andy Rae is managing the hotel for the present.

Goods Stolen From Car
A case of theft has been reported at the G. T. P. station here, and an investigation will be made by the company. A car of merchandise was sealed up last Monday evening and the following morning it was found that the car had been broken into and a quantity of goods stolen. The shipment was billed to a town south of Mirror.

I Want You For My Neighbor in B.C.
So says F. L. Harris. Read his ad. on page 4, about his offer of B. C. fruit lands in B.C.

New Manager For Lumber Co.
J. N. Mitchell has been appointed manager for Imperial Lumber Co. in Mirror, as successor to O. F. Bentley. Mr. Mitchell should be able to fill the position o. k.

The Journal for a Quarter
We will send THE JOURNAL to any address in Canada from now until the 1st of January, 1913, for the sum of twenty-five cents. Send it to your friends; it will give them the news of the town.

Assessment Roll Ready
The assessor of the village has completed his task of assessing the property and the roll is ready for the sanction of the Council. The notices will be mailed in the course of a few days. The job was a big one for a start and required a considerable amount of time.

Dream Coming True
"A Mirror man dreamed that the burg was nearly as large as Alix, both in size and population. Alas, he fell out of bed and awoke from his beautiful dream."—Alix Free Press.

It's no dream, dear brother, it's becoming more of a reality every day, and we believe that if a census of the two places were taken it would show so much of a dream after all.

Said Sent to Arnprior, Ont.
The Board of Trade has forwarded a quantity of Buffalo Lake sand to Arnprior, Ont., where the McPhoe Process Works will manufacture a number of bricks. The firm in

MIRROR, ALTA., SEPT. 20, 1912

ALBERTA RECEIVES GRANTThe Alberta government has
signed the agreement with the
federal authorities at Ottawa
by which it secures the subsidy
voted last season under the act
passed to encourage agricul-
ture. Every province now, except
British Columbia, has
availed itself of the subsidy
and has reached an agreement
as to the way in which the money
is to be spent.The British Columbia agree-
ment will be signed very short-
ly. Half a million dollars was
voted under the act, and it was
divided amongst the provinces
according to the population, in-
respective of the policies of
their government, and have co-
operated with the minister of
agriculture in endeavoring to
use the money to the best pos-
sible advantage, and the scheme
promises to work out admirably.The Alberta subsidy amounts
to \$26,004.50, and according to
the agreement, which has been
signed the money will be spent
as follows: Dairy shorthorns,
\$10,000; women's institute and
domestic science, \$3,500; live
stock demonstration, \$5,000;
excursions to experimental
farms, \$600; to encourage poultry
stock, \$2,500; exhibit at dry
farming congress, \$2,000; ex-
pense to bring in cows to sell to
farmers, \$2,000; miscellaneous,
\$494.40. Total \$26,004.50.**BAILED OUT OF JAIL**It is the unique experience of
Tom Three Persons, of the
Blood Indian Reserve, who won
the championship of the world
for broncho busting in competi-
tion with riders from Texas,
Wyoming, Colorado and Mexi-
co, to have been bailed out of
jail for the purpose of compet-
ing in the big event of the
Stampede, and further, to have
been congratulated on his suc-
cess by H. R. H. the Duke of
Connaught, when he returned
from his triumph in the arena
to complete his term in jail.The Indian is in jail for a
short period. He returned
wearing the golden champion-
ship belt, and with \$10,000 to his
credit, and will find himself
one Indian with fortune on his
release from custody.**CONCESSIONS FOR HOME-
STEADERS**The Department of the Interior,
Ottawa, has given out the
information that it has been
decided to allow the holder of a
homestead, homestead and pre-
emption, a purchased homestead
or a volunteer scrip loca-
tion, to absent himself from the
land held under entry by himfor the purpose of undergoing
annual training in military in-
struction camps.It has also been decided that
the time so spent will be counted
as the performance of the
residence duties, provided the
entrant furnishes the depart-
ment with a certificate from the
superior officer, showing that
the time involved was
spent in actual training.Those who apply to the de-
partment directly or through
local agents for permission to
leave their land for the purpose
of engaging in harvesting op-
erations are to be granted pro-
tection while so absent.**G. T. P. NEWS**During the month of July last
six stations were completed on
the line of the Grand Trunk
Pacific west of Winnipeg and
work well advanced on seven
others. In the first class are
Mile Post 11, Alberta Coal
Branch, Resplendent, Dinant,
Alpland, Trochu and Yellow-
head; while Minota, Three
Hills, Mile Post 34, Mile Post 25,
and Mile Post 17, all on the Al-
berta Coal Branch, as Edwin
and Ricketon come under the
second category.According to a despatch, E.
J. Chamberlain, president of the
Grand Trunk System has
announced the company's de-
cision to use oil as locomotive
fuel on the mountain section of
the G. T. P. The company has
large sections of oil lands along
its lines which should assure a
practically illimitable supply.
Eventually it is hoped to use
oil also on the National Trans-
continental section of the road.**BASHAW BUDGET**

September 20.

We have been experiencing
the usual effects from the late
downpour, viz. silent binders
and heavy roads, but now the
sun has once again come into
its own, everybody is busy—
piling in—making up for lost
time.Mrs. Bremer's candy store has
changed hands and is under the
management of C. W. Maddi-
son, who returned this spring
from South Africa, having left
these parts during the late
South African war.A well known townsman, Mr.
Foscar, has left Bashaw with
the intention of wintering in a
warmer climate. We believe
Vancouver is the Eldorado he
is away for.A slight frost was experien-
ced here last week, some pos-
sibilities having evidenced the frost.Bashaw avenue bears a more
solid aspect owing to two sub-
stantial new stores having been
erected thereon. Our local ton-
orial artist, to wit, Mr. Miller,
is now erecting a really credit-
able building, which will con-
tain accommodation for his
ever-increasing barber trade,
together with an up-to-date shoe
repairing department, also res-
taurant. The other building
under the capable hands of
Messrs. Bashaw & Sons, which
will be opened shortly by Mr.
Ledgerwood with a new line of
goods, is now about completed.
We understand that Mr. Ledger-
wood is making what should
prove a welcome innovation,
viz. a reception room for ladies
visiting the town, irrespective
of being customers of his or
not.A lawyer in a court room may
call a man a liar, a scoundrel,
villain or thief, and no one
makes complaint when court
pronounces. If a newspaper
prints such a reflection on a
man's character there is a libel
suit or a dead editor. This is
owing to the fact that the people
believe what an editor says.**I Want You For
My Neighbor****In the Prize-Winning
District of B. C.**

THERE is hardly a man, woman or child in Canada, who
can read but have heard of my famous Honeymoon
Place fruit and poultry ranch, on the Main Kootenay
Lake in British Columbia. You haven't seen the Koot-
enays without visiting my ranch. I live there myself, it is
my home. I spent five years locating this ideal spot. I lived
on the Pacific Coast—Portland Ore.; Hood River, Ore.;
Yakima Valley, Washington, Seattle and Vancouver for five
years, trying to find out which of the districts I wanted for
my home—none suited me like the Kootenay Lake district.
Here we do not have to irrigate as they do in the Hood
River, Yakima, Okanagan and East Kootenay district. We
do not have the rainy season as on the Coast. Our climatic
conditions are just right for the Main Kootenay Lake never
freezes over; boating and fishing the year around. In the
Fall big game of all kinds can be had by sportsmen who are
willing to go back fifteen miles or so into the mountains.
Wild ducks, geese and chickens are plentiful, and fishing—
If you have never landed any of our Kootenay Lake rain-
bow trout—you don't know what fishing is, besides catching
salmon trout that will weigh from ten to thirteen pounds is
no easy trick, and when it comes to eating them you wouldn't
wonder why I like Kootenay Lake. Of course, fish are all
right, but if you enjoy fruit of all kinds—such as apples,
peaches, pears, apricots, cherries, raspberries, grapes, black-
berries, strawberries, etc.—you will never find a place where
they will "go to the spot" as in our district, where we have
just the right amount of rain to insure good crops. Do not
compare our fruit to fruit grown in an irrigated district. Our
fruit has that delicate delicious flavor such as is found in
choice fruit grown in the Eastern States and Provinces. Send
for the October number of the "Kootenay Magazine" and it
will tell you all you want to know about Southern B.C., fully
illustrated (postpaid 25c). It gives briefly my plan on how
to bring apples into commercial bearing in two years. "Har-
ter's New Method of Apple Culture" should interest every fruit
grower in Canada. Where you made \$1,000 per acre from
apples, you can by my method make \$2,000. The October
number also contains a story of my "Five Years Homeseek-
ing" which will interest anyone wanting to find an ideal
home in the West. There are scores of fine photographs and
scenes of interest in the Kootenay district. Tells you of
my selling plan. "81 down and \$1 per week proposition" for
an acre of improved fruit land is one plan. "420 down and
\$10 per month" for five acres—one acre cleared and planted
and taken care of for five years, you to share in crops after
the second year, is another plan. "450 down and \$25 per
month" is another plan for ten acres. A discount of 10 per
cent. for cash.

Land selling at from \$50 to \$150 per acre, over 5,000 acres to
select from. Next regular monthly excursion to my offerings in
B. C. will be on September 25th, leaving Winnipeg at 10.40
p. m. Read the many letters in the magazine from satisfied
buyers—they are genuine. If you cannot go out with me on
my next excursion to make your own selection, I will make
it for you. All tracts will be raised \$25 per acre after Octo-
ber 1st. They are worth \$200 per acre right now—I should
ask it, but I want to give several hundred more "homeseek-
ers" like myself a chance to buy right and if I use you right
you will be a desirable neighbor. That is what I want, good,
clean, desirable neighbors and you cannot buy land from me
unless you are right. I have sold to over four hundred people
since January 1st, and I have yet to find one that I would be
ashamed to call my neighbor. Write me, giving the name
of at least one reliable reference, state nationality—if mar-
ried—and amount you wish to invest and I will send you
more particulars regarding the wonderful opportunities in
the Kootenay Lake District. Remember, I live there myself
—have my own fruit and poultry ranch. I wouldn't ask you
to live where I would not be willing to. This is worth your
careful consideration.

CARE OF BATHROOM.

Ventilation an important part of the Program.

Even the most perfectly appointed bathroom cannot be kept immaculate unless the different members of the family co-operate in keeping it in order. Of course where there are a number of servants this rule does not apply, but the average family usually has only one maid, who cannot follow each person after the bath to attend to the bathroom.

The least each person can do is to leave it in perfect order for the next one—the wet towels placed in the receptacles intended for their temporary disposal, the others neatly folded, the basin and tub washed and wiped and the window opened. Any member of the family who leaves them otherwise, either in the morning or during the day, should be sent back to "make good" or made to pay a heavy fine into the family treasury.

It is the housewife's duty to see that a small bath brush, some cloths and strong soap are kept in a small closet in the bathroom for cleaning of the basin and tub and wiping up the floor, so that her best towels will not be used for that purpose and that there is a temporary receptacle for wet towels so that they will not be put into the bathroom wet. The closet holders serve that purpose beautifully.

Opening the window is a very essential duty, although many never think of that detail, especially in the winter. One should no more think of making water to bathe in the air in which a bath has been taken than in the same water. It is heavily laden with impurities.

For the daily cleaning one needs the invisible scrubbing brush, with one of the sand sponges, for the floor if it is tiled. For the polished tiles of the wall and porcelain of tub and basin the rough sand soap must be replaced by a smooth soap or cleaning powder. There are numerous soap powders on the market that serve the purpose without scratching the surface. There is also a special cleaning powder made for the purpose. Yellow stains may come from the water in the tub. They may come from rust in the iron pipes. If they do occur, acid in the cleaning water will remove them.

Washing mixed with alcohol will keep the nickel in perfect condition if it is used frequently.

ASPARAGUS RECIPES.

Ways of Cooking the Season's Most Delicious Vegetable.

Asparagus Loaf.—Cut top crust from a loaf of stale tin bread and remove the crumbs, leaving only the side and bottom crusts of the loaf. Beat the loaf in the oven until quite dry. Cut steamed asparagus into inch lengths, season to taste, mix with a good white sauce and fill the hollowed loaf with the mixture. Replace the top crust and set in the oven until hot.

Browned Asparagus.—Cut this up into half inch strips. Shape it on a baking pan into the form of double bowknots. When baked put cooked asparagus tips on each loop of

the bow sprinkle a little clear melted butter over and serve immediately.

Asparagus Salad.—Steam the asparagus until tender, then cut off the tips with a slice of the outside white into inch lengths, and when cold put these over leaves of lettuce in a glass or china bowl. Sprinkle with three well mixed tablespoons of olive oil to one of lemon juice, salt and pepper to taste and a suspicion of sugar and tiny sprink of made mustard. Tasty, sprightly over a simple green tongue.

Asparagus With Frozen Cream.—Steam some asparagus until tender. When cold mix the branches in a dish. Sprinkle them lightly with salt and pepper. Serve them with frozen cream as a sauce.

A Tasty Breakfast Dish.—On the White House breakfast table fried hominy cooked a delicious potato course and served with maple syrup of ten forms a part of the first meal of the day. Although not a White House delicacy, the following recipe for very mild chocolate will be found very good.

Line a chocolate mold with white chocolate or fudge cake, pour the Hot Top Cooking School Mixture. The strips of cake should be no more than one-fourth inch thick, an inch wide

FRIED HOMINY AND CHOCOLATE CANDY.

and of a length to come just to the top of the mold. Stuff one fourth (pack) of gelatin in one fourth cupful of cold water. Cook two-thirds cupful of sugar to caramel, add two-thirds cupful of boiling water and let simmer until the caramel is dissolved. Keep the water over the gelatin. Set the dish in crush and add water and stir until the mixture begins to thicken, then fold in one cupful and a half of cream beaten very light. One cupful of heavy cream and a half of cream from the top of a bottle of fresh milk will answer the purpose. The third mold. When the mold is filled with the mixture, it should be smoothed with a spatula or blanch almonds shredded or chopped and browned in the oven.

Incongruous.

A clerical correspondent of one of the London church papers relates that a certain priest had great difficulty in suppressing his laughter at the consecration of a church the other day owing to the device on one of the altar banners which were carried in the procession before the service. This banner was adorned with a very fierce looking lion, with terrible claws and teeth, while underneath him was the legend, "Suffer little children to come unto me."

BRUMMEL'S FAMOUS CRAVAT.

It Was a Work of Art, Tied Only by a Sudden Inspiration.

George Brummel, better known as "Beau Brummel," was for twenty years the depository of fashionable London society. At a time when Napoleon was winning his victories there were people who would have preferred the fame of the prince of handsets. But it should not be supposed that he was extravagant in his dress. William B. Burton in "The Days of the Georges" quotes his famous aphorism, as true today as it was then, "A well-dressed gentleman ought to have nothing which would attract particular attention in the street." He took the elements of dress as he found them and brought each to perfection in a harmonious combination. His one innovation was the white cravat, and upon this he lavished his genius. He had a theory, which he imparted to his intimates, that a cravat should be properly tied only by a sudden inspiration and that if that inspiration failed it was necessary to begin over again. Such serious views on this mighty question doubtless explained the appearance of Mr. Watson (Brummel's valet) on the staircase with an armful of white cravats, and his remark to a favored guest, "I'm of our failures."

To avoid inquiring into the mysteries of the cult Brummel whispered the magic word, "Starch." The famous neckwear, it appears, consisted of many feet of fine linen stiffened to the exact degree which would allow of three parts of its length to be held up without sagging. Having attained this fine temper, it was ready for Mr. Brummel's throat, and the central fibre of the toilet began.

An each fold encircled his neck there was a solemn bending down of the head in order that it should take a natural curve, this being repeated until the whole presented an aspect acceptable to his fastidious taste, when it was secured by a gold brooch, and the ritual was at an end. A few—very few—of his most intimate friends were admitted to these sacred mysteries. The Prince of Wales, of course, came when he chose, which was often. He would honor the man by watching him silently by the hour at his dressing table.

Successful "Duffer."

Major Sir T. B. Robinson, agent-general for Queensland, presented the prizes at the Crystal Palace Engineering School, London, some time ago. He said that he had always been very bad at examinations and had never won a prize. Nevertheless, he was included in a list which contained the names of all the leading engineers of the day, though he did not know why he was placed there.

It is really astonishing," Sir T. B. Robinson went on, "what efforts I am obliged to make to keep my mind on myself, that all our difficulties must yield to persistent effort. I have often asked men in high positions to what they attribute their success, and it is astonishing to find how little they know of it. It is the fellow who does everything a little more thoroughly and promptly, a little quicker than other people who goes ahead."

CARE OF SHEEP IN WARM WEATHER.

If the owner of a flock of sheep knew that some enemy were coming into his flock and mauling the sheep by eating new fleas under the wool he would stop everything and remedy the trouble, writes J. C. Courten in *Pure and Practical Sheep Husbandry*. Such is happening day by day during dry time in many farm flocks.

Last summer I visited a flock of sheep. As soon as I saw them I knew my neighbor was suffering from fleas. I saw fleas in his lamb. Here and there among the flock were young lambs standing with heads down, twisting and squinting in an endeavor to scratch the soiled wool off their tails. I saw fleas in the wool of the tail. But that was the ugliest danger signal. We got busy at once to fight the pest. He bought a 4 or 5 per cent solution of a crude coal tar dip and a

Photo by American Press Association.

The roundup is one of the popular custom breeds of sheep and quite extensively bred. The breed is furnished. The fleas and lice are of a gray-brown color. This breed is furnished a fleece of good quality weighing from six to seven pounds. The wool is rather short, but of medium fine texture. The mutton is of excellent quality.

brush, shears and syringe. Each lamb affected was caught and shown to the dirt wool around the tail end. This exposed the enemy, and certainly they were there in legions. Great masses of wriggling, crawling maggots were moving. Some were already deep under the skin, some imbedded only in the wool. Their work in the wool fretted the lambs this. When they bored deeply into the flesh matters became serious. In fact, one little lamb soon died from its maggot wounds.

The stiff brush soon scattered them out of the wool after the application of the dip had stung them, and caused them to loosen their hold. In the flesh wounds the syringe or syringe washed them out. Those deeply imbedded in the flesh caused some trouble, but by filling the wound full of the field and then working around all the "pockets" with a strong probe they were dislodged. The smell of the dip prevented later infection in the wool, and clean close hair kept the flesh wounds clean.

If we had not had the coal tar dip a strong brine would have done fairly well or a solution of five parts water and one part turpentine or kerosene. These should be washed out, however, for they might irritate the skin. A hot and sultry and turpentine salt may also be used.

Value of a Good Girl.

A correspondent to the Pacific Daily Review writes: "It is becoming quite a common thing for good breeders of dairy stock to pay from \$500 to several thousand dollars for a fine to breed their herds. Such prices may seem to be extravagant, but by a little calculation it can be seen that the investment is a good one. Supposing a man has a herd of forty or fifty cows and that the average cost of a cow is \$1,000. Such a herd would certainly increase the value of every cow from \$200 to \$500 each over a five or six years. If he might buy a cow, say \$75 or \$100. We think that a fair average of a cow would be \$50 per cow, and presuming the breeder would have forty calves, the increase of value in one season alone to the breeder would be \$2,000, so that the breeder would make a profit on the investment of 100 per cent the first year and still have the cow left. The following year he would again be worth \$2,000 in his cow, and so on for many years. If this estimate looks like to your readers you are welcome to cut it in two and then tell us if you consider the investment a profitable one."

Caring For Milk in Summer.

In order to properly care for milk during the summer time a milk house containing a tank, preferably of cement, is absolutely essential. The milk should be cooled as quickly as possible to 40 degrees by placing the cans in the tank of cold water. As the milk is milking is finished put the covers on the cans. Milk does not require dipping or pouring. Immediate cooling every night is the important point.

If one cannot afford a milk house he should at least provide a tank or tub in which to place the cans and surround them with cold water. If ice is available use it in the water; if not change the water a sufficient number of times to insure proper cooling. Use a thermometer. It costs very little and will pay.

Faults in Hog Breeding.

It is not only necessary to have pure breeding stock, but it is just as important that the proper type be selected and the animals well maintained. The pure breeding hogs of every type and mixing these types in breeding operations will produce animals not little better than those who sold for breeding animals. Of course they feed out better, if the proper type is not maintained the real breeders do not want them.

Farm Dairying

engage creamers after each time of milking. First rinse the parts which have come in contact with the milk in lukewarm water, then wash in hot water in which some washing powder has been dissolved. Use the brushes provided by the manufacturer to clean the different parts. Rinse in scalding water and place on a tray to drain, and dry in a drying cabinet. "Just water should be sufficient."

To scrub the rubber rollers with hot water—first with rubber.

The separator brushes should be frequently washed in lukewarm water in solution to keep them sweet. Have a square of cloth to throw over the rollers after making butter, and when wiped. This prevents dirt getting in the bearings.

A machine should not leave over 0.5 per cent fat in the skim milk when properly managed. When the loss exceeds this it is time to look for a cause. Heat good skimming does not leave over 0.2 per cent.

Jellie Johnson,
Champlain, Idaho.

X—Separators and Treatment of Cream.

By LAURA ROSE,
Demonstrator and Lecturer in Dairying at the Ontario Agricultural College, Guelph, Canada.

Copyright, 1914, by A. C. McArthur & Co.

THE invention of the cream separator gave a great impetus to the butter industry and revolutionized the handling of milk and cream.

The best question, "Which is the best make of separator?" All the standard makes have good points, and the question often comes to a matter of small details, which appeal differently to different people. In buying a separator select a good model, one that turns easily, is well made of good working material, and is constructed in construction, easy to clean, convenient as to height of cream and skim milk outlets and supply large for the size of the herd.

It must be remembered there is a wide difference between the price of the same make, and a purchaser should satisfy himself that his machine is of good skimming and is made of good material before buying. The price of a separator should not be set up too high. Occasionally a separator is in an empty cow stall, "this & that," it is convenient to have a small room fitted up for the machine next to or in the stable. Such a room should be well ventilated and clean and the door light.

Firm Foundation Needed.

The foundation of a separator should be firm. Even a slight vibration injures such a finely constructed piece of machinery. For this reason the machine should stand perfectly level. A small piece of quarter inch rubber matting, placed under the feet of the machine, will do the trick before fastening, improves the running of any separator, and keeps the parts clean. Every week or two run a little benzene through the oil chain to remove the grease and accumulated dirt from the bearings. But do not fill to oil the machine after. Afterward, Cool oil is not a lubricant, simply a cleaner. Use only the oil furnished by the manufacturer for the separator.

When starting the machine get up quick gradually. Let the machine warm up on the handle during the entire cycle of it and sustain an even speed. Force cream skimming run the machine a few turns above the tabulated speed before starting. Stop the machine as the butter begins to form. Do not touch the handle for a few minutes. Keep all parts clean. Every week or two run a little benzene through the oil chain to remove the grease and accumulated dirt from the bearings. But do not fill to oil the machine after. Afterward, Cool oil is not a lubricant, simply a cleaner. Use only the oil furnished by the manufacturer for the separator.

Always Strain Before Separating.

Milk should always be strained before separating. The sooner the dirt is removed the better. Use a strainer of small pieces of straw, etc., are apt to clog the outlet. Putting two layers of muslin over the strainer, and then cream and holding them in place with a rubber band is a convenient method.

Milk at its best for separating is lukewarm after being strained. If the cows should be cooled to 55 degrees it is better to warm it, although some do good skimming at the lower temperature, but there is always a risk of losing cream when the temperature is too low.

Should the milk supply become so small that it seems hardly worth while separating, it is better to cool the milk and preserve the quality in skim milk. This milk is good for the cow. The milk held over milk should have the cream skimmed off. If the milk is held over for, for no harm, but really good, results from having the cream skimmed off. The cream of the morning's milk has been separated. This practice has its disadvantages. It is not only the milk that is lost, but the cream. The machine must be thoroughly

Points for Mothers

The Size of Babies.

Many mothers are ignorant as to the size of the average infant and to compare her own with that is considered as a standard. The following measurements are given by Dr. Holt and may be accepted as average, says the Woman's World.

At birth—Height, 20 1/2 inches; chest, 13 1/2 inches; head, 14 inches.

One year—Height, 30 inches; chest, 18 inches; head, 18 inches.

Three years—Height, 35 inches; chest, 20 inches; head, 19 1/2 inches.

The matter of the weight is one which should be watched most carefully. The gain in flesh is a good indication as to whether or not the child is thriving and often determines the amount and character of its nourishment. During the fifth month a baby's weight should be about doubled, at the end of a year it should be tripled. For the first six months the gain of the first week will probably be from four to six ounces until the child is six months of age. This rate will be reduced during the next six months, when the supply to be fed will be from two to four ounces each week. At the end of the first year, four or five pounds is all that can be expected until the child is nine or ten months of age.

Special emphasis must be laid upon the advisability of weighing the baby regularly at the first of every year, when a change of food is made.

Selecting the Infant's Shoes.

For the first few months of its life the baby does not need shoes. It is in the winter months that shoes should be worn. In such a case worn mittens and boots should be worn. It is a mistake to think that shoes should be worn until the baby is old enough to stand on its feet. It is better to wait until the baby is old enough to stand on its feet and then to give it shoes.

HIGH AND LOW CITIES.

And the Difference in Our Altitudes East and West.

The difference between the eastern and western elevations in this country are astonishingly striking. Colorado has forty peaks that are more than 14,000 feet above sea level. Mount Vernon, in New Hampshire, and Mount Washington, in New Hampshire, are the highest peaks in the Appalachian system north of the equator, are considerably higher than any of the peaks in the west.

Several transcontinental railway lines in the west pull their mile trains over a greater elevation than the highest peaks of the Rockies. The line from Kansas City to St. Louis, for example, crosses the highest peaks of the Rockies.

Most large cities in the west, Chicago is only about 600 feet above sea level and Philadelphia, but a hundred feet higher. Philadelphia ranges from sea level to a height in its suburbs of about 200 feet. St. Louis, near the head of the Mississippi, has an elevation of less than 1,000 feet, and various parts of New Orleans, at the mouth of the great river, are recorded in the government tables as having elevations of from one foot to fifty feet. St. Louis has about halfway between these two extremes.

Montana is away up with its leading point perched at the elevation of the high peaks of the Rockies. The highest point in Montana is a mark near the head of the Missouri river, and is about 10,000 feet above sea level. New York is at the foot of the mountains.

SLEEPING IN CHURCH.

Restful Peace From the Baroque and Numerous Blandishments.

It is a fact of common experience that bright lights in a chamber, however small, are a source of annoyance. This phenomenon is easily explained by the current knowledge of the human eye. The eye is a sensitive organ, and the light is a powerful agent in the human eye.

DUITMAN & JOHNSON,
THE LAKE STREET HARDWARE - MIRROR

TOFIELD-CALGARY LINE FINISHED NOVEMBER FIRST

Edmonton, Sept. 18.—With the completion of the work of Marsh, Sims, Carey, Smith & Co., the grade of the Grand Trunk's branch line to Calgary via Tofield has been practically put in readiness for the laying of steel into the latter city.

These contractors had a very large contract on the branch, most of their work being at Irricana, about thirty miles from Calgary. Their contract comprised the moving of about one hundred and twenty-five thousand yards of material, most of which was classified work. Most of the work was done by steam shovels.

The same complaint has prevailed along this line as has prevailed along most of the lines this summer, that is, of the superfluity of rain and the difficulty of obtaining labor. As a matter of fact, the contractors found great difficulty in keeping men after they had secured them.

The branch runs through an almost new country, and will be one of the Grand Trunk's most important branches. At the present time the steel is laid from Tofield as far as Irricana, and the grade is now ready for its entry into the southern city. A bridge at the Bow river, about four miles out of the city of Calgary, is likely to hold up the track-laying at that point for a little while. This bridge is of steel construction and is to be erected by the Canadian Bridge company. It is expected that will be completed and the steel laid right into Calgary by the first of November.

APPOINTMENTS IN MIRROR MISSION

Definite news has at last been received in regard to the work of the Mirror Mission. For the balance of the church year, ending June 1913, the circuit will consist of the following appointments: Mirror, Manfred, Waterglan, Hopedale and Bullockville. This arrangement has necessitated the dropping of the Rutherford appointment. It is the wish of the pastor, Rev. H. H. Brooke, that the friends at all appointments co-operate with him in his efforts to make the ensuing year one of the most successful in the history of the Mission.

LUMBER SHEDS BURNED AT BASHAW

A fire that started between 12 and 1 o'clock early Saturday morning last, completely destroyed the lumber shed and office, together with the contents of Bashaw & Sons, at Bashaw. The origin of the fire is supposed to be the work of an incendiary, as several parties passed close to the building at midnight and there was no indication of fire at that time. Shortly after, however, the fire was discovered in the centre of the lumber shed, and had gained such a hold that it was impossible to save it. Seven cars of finishing material had been unloaded a few days previous. Loss is estimated at about \$15,000, with \$12,000 insurance.
